

What is energy in Luxembourg?

Energy in Luxembourg describes energy and electricity production, consumption and import in Luxembourg. Electricity sector in Luxembourg is the main article of electricity in Luxembourg. Primary energy use in Luxembourg was 48 TWh in 2009, or 98 TWh per million inhabitants.

How much electricity does Luxembourg use?

Electricity sector in Luxembourg is the main article of electricity in Luxembourg. Primary energy use in Luxembourg was 48 TWh in 2009, or 98 TWh per million inhabitants. Luxembourg is a net energy importer; 81.5% of the electricity consumed in the country, for example, was imported from neighboring European countries in 2021.

Does Luxembourg need a new electricity infrastructure?

Luxembourg aims to cover over a third of 2030 electricity demand with renewables, mostly through variable renewable energy (VRE) from PV and wind generation. The share of VRE generation in imported electricity is also expected to increase significantly. Taken together, these factors will require substantial investment in electricity infrastructure.

What is Luxembourg's energy mix?

Luxembourg's energy mix is dominated by oil at 71.3%: all of this is imported. The second largest source is gas, and there is only limited use of energy from renewable sources. Its significant consumption of imported fuels Luxembourg is one of the EU countries with the highest import dependency (up to 95%), negative

How will Luxembourg improve its energy system?

In this context, Luxembourg plans to expand and upgrade its electricity grids, but the country would benefit further from the deployment of measures to increase energy storage and demand-side response in its power system. It is also important to ensure competitive markets that foster innovation and new energy services.

How is Luxembourg transforming the European electricity market?

Luxembourg is embedded in the European electricity market, a sector that is transforming swiftly as rising shares of variable renewable generation, such as wind and solar PV, put increased attention on security of supply.

The Energy Efficiency Obligation Scheme is one of the most ambitious cross-cutting measure implemented in Luxembourg in the field of energy efficiency. It was designed according to the ...
