Maintenance | REAP is committed to research, develop and produce technology-based Battery Energy Storage System solutions for supporting the energy transition and helps customers for their Net Zero targets.

Conveniently, he says it takes six hours to fully charge the battery - nearly a full work day. The money he once spent on fuel has dropped significantly, too. Before he bought an EV, he used to pay more than MOP 2,000 for fuel per month. ... As Macao depends a lot on the electricity supply by the mainland, EVs in the city will also benefit ...
