

Maldives demi solar

What is the Maldives solar project?

The Maldives solar project is a 36 MW solar power project and 50 MWh of battery energy storage solutions development across various islands in the Maldives. It also includes grid modernization for the integration of variable renewable energy with the grid, which will be financed under the proposed AIIB loan.

How much solar energy does Maldives receive?

o Maldives is located in the Equator and receives abundant solar energy. o Maldives Receives about 400 Million MW of Solar Energy Per Annum. o Average Sunny Days Per Annum - 280 - 300 Sunny Days o Daily Average Global Irradiation in Maldives is 4.5-6 kWh/m²/day 3 .

Will a 5 MW solar installation make Maldives a popular destination?

Now, one of the first sights for any of the 1.7 million tourists visiting the Maldives will be that of the 5 MW solar installation on the highway linking the airport island to Male and its satellite town of Hulhumale.

Should investors invest in sustainable solar projects in the Maldives?

In 2014, the first 1.5 MW solar project under ASPIRE only had four investors bids, and resulted in a high power purchase price (PPA) of 21 US cents per unit of electricity, indicating a lack of interest from investors in investing in sustainable projects in the Maldives.

Is the Maldives a sustainable investment destination?

This journey, which started in 2014, is now seeing unprecedented interest from international investors and helping establish the Maldives as an investment destination for sustainable projects.

When will the Aspire project start in the Maldives?

The inauguration of the 5 MW solar project on December 7, 2022 under the ASPIRE project has been a game changer in the energy transition journey of the Maldives .

Specifically for Maldives, regional data accuracy enhancement procedure was applied. Uncertainty of the solar resource data has been reduced by the regional model adaptation based on the ground measurements collected at solar meteorological stations, located across the country. GIS data is provided in higher spatial resolution and also as long-term monthly averages.

With 2,700 hours of sunshine per year, the Maldives is the perfect place for solar energy. Since there are no electrical cables running between islands, each island has to have its own self-sufficient energy supply. Normally that means diesel generators, which are expensive and polluting. But now the eco-friendly five-star
