

What is the energy access problem in Mali?

Mali faces a critical energy access challenge. The national power access rate was 50% in 2019 (compared to 36.11% in 2015). The problem is particularly acute in rural areas with 21.12% access rate in 2019 (compared to 15.75% in 2015).

Is energy in Mali subsidized?

Energie du Mali (EDM), the state-owned electric utility, is poorly managed and heavily subsidized by the government and regional multinational banks, as the relatively high price of its electricity (average \$0.17/kWh) is insufficient to cover the cost of production and distribution (\$0.24/kWh).

What is Malian energy policy?

Malian energy policy aims at contributing to a sustainable development of the country by making energy services available to as many as possible, thereby favouring (promotion of) social-economic activities. There are four specific objectives: Strengthen international cooperation regarding the energy sector.

How much energy does Mali use?

The remaining 4% of the primary energy supply is largely made up of renewably generated electricity, mainly by hydropower. On the energy consumption side, households consume 86 % of Mali's energy, (road) transport 10 %, industry (mainly mining) 3 % and agriculture 1 % (2003 figures). [Go to Top](#)

What is the energy strategy of Mali?

The general energy strategy of Mali focuses on the development of local resources such as hydropower and solar energy in order to reduce petroleum imports. Objectives of the National Energy Policy regarding renewable energy are: Promotion of RE.

Is biomass a good energy source in Mali?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Mali: How much of the country's energy comes from nuclear power? Nuclear energy - alongside renewables - is a low-carbon energy source.
