Is Mozambique ready for the next wave of energy projects?

Guilherme Luiz Drehmer of the Bureau Veritas Group talks about preparing for Mozambique's next wave of energy sector projects. Discoveries have changed fortune of Mozambique. Once a hydrocarbons backwater, country now has the potential to become one of the world's largest LNG exporters.

What energy sources are available in Mozambique?

Mozambique has abundant energy sources available for exploitation. As of 2021, the country was ranked first in energy potential of all the countries in the Southern African Power Pool (SAPP), with an estimated energy capacity of 187,000 MW. Available energy sources include coal, hydroelectricity, natural gas, solar energy and wind power.

How much solar energy does Mozambique have?

Mozambique has a potential solar energy yield estimated between 1,785 and 2,206 kWh/m<sup>2</sup>/year, resulting in a solar energy potential of 23,000 GWh/year. In August 2019, the first grid-ready solar power station, the 40 megawatts Mocuba Solar Power Station, in Mocuba District, Zambezia Province, achieved commercial commissioning.

Does Saipem Mozambique have a patented energy technology?

Saipem has been awarded a \$1.9-billion EPCI contract by TotalEnergies for the GranMorgu project offshore Suriname. Michele Poggi of Saipem Mozambique talks about incorporating patented technologies into Mozambique's energy value chain.

Does Mozambique produce oil?

Mozambique has traditionally only produced gas from its onshore plays operated by South Africa's Sasol. The country produces no oil and is reliant on imports. Mozambique has worked hard to streamline policies and break down bottlenecks in meeting its immense capacity potential.

How much natural gas does Mozambique have?

Mozambique has proven natural gas reserves in excess of 180 trillion cubic feet. In the north of the country, AREA1 is under concession to TotalEnergies. AREA4 is concessioned to ENI and ExxonMobil.
