Could geothermal power Montserrat?

From 2012 until 2017, Montserrat made a push towards geothermal as a potential source for powering the island. Geothermal was the Government of Montserrat's (GoM) first thrust into implementing renewable energy (RE) technology. To date, the government has drilled three wells, namely MON1, MON2 & MON3.

How much does electricity cost in Montserrat?

In common with the most of the Eastern Caribbean, Montserrat has high electricity generation costs of up to US\$0.50 per kWh (PKF, 2012; giz and CARICOM Energy Programme, 2016), due to the use of diesel-powered generation plants. These high costs use up valuable foreign exchange and reduce the competitiveness of local industries.

How much energy will Mon1 & MON2 provide Montserrat?

Despite issues with MON3 which experienced a collapse around 1,500m; it is estimated that MON1 & MON2 could provide Montserrat with approximately 3 to 4 MW of energy. This was confirmed from an "Early Market Engagement (EME) - Report," organised by the MCWLE.

What does sundex do?

Sundex, the global expansion arm of sunergies, specializes in the commercialization of solar energy and spearheads the company's international market growth. Presents an intelligent proposal to take care of the planet and finances, integrating sustainable and socioeconomic values.

Does Montserrat need less capital expenditure?

The Task Force noted that thanks to Montserrat's development partners, the Foreign Commonwealth and Development Office (FCDO), "we have reached a point of low-risk factor and the need for less capital expenditure (CAPEX)." The island, they said, had adequate test data to attract further investment.
