

National development energy storage credit

Who can claim energy storage credits?

Taxpayers with a qualified facility and energy storage technology placed in service after Dec. 31, 2024 may claim the credit. Elective payment and transfer of credits may be available to certain applicable entities to include tax-exempt organizations and government entities.

What regulatory guidance has the government released on energy storage?

Of particular importance to the energy storage industry, the government has released final regulatory guidance for the ITC (both Section 48 and 48E of the Code), prevailing wage and apprenticeship (PWA) requirements, and transferability and direct payment, as well as other guidance on the energy community and domestic content tax credit "adders."

Does battery energy storage qualify for a domestic content adder?

Given the current state of battery cell production in the United States, battery energy storage has largely been locked out of a financeable position on qualifying for the domestic content adder given the stated materiality of battery cells to a domestic content analysis.

How much credit does a facility get?

Credit is increased by up to 5 times or up to 30% for facilities meeting prevailing wage and registered apprenticeship requirements. 10-percentage points for facilities meeting certain domestic content requirements for steel, iron and manufactured products. 10-percentage points if located in an energy community.

Alliance for Clean Energy New York ACE NY generally supports the underlying components of NYSERDA's Bulk Energy Implementation Plan (IP) and more specifically ...

Given New York's upcoming energy storage incentives, we are moving in that direction, with the New York State Department of Public Service (DPS) and New York State ...

2 · The National Development and Reform Commission (NDRC) of China has released a strategy to accelerate the development of a new power system of the 2024-2027 period, ...

NYSERDA is providing incentives that can help accelerate deployment of bulk energy storage projects that provide wholesale market energy, ancillary services, and/or capacity services.

2 · With 30 percent storage tax credits available until 2033, now is the time to tackle the energy affordability crisis and the load growth surge from data ...

Introduction and Background This document sets forth for public review and consideration by the New York
