

Nexgen solar Mexico

How much does solar cost in Mexico?

The market is favorable for solar energy projects thanks to low equipment costs, strong renewable energy policies, and several national solar power programs. Solar panels in Mexico cost an average of \$3.07 per watt, and we expect this to decrease further as the development of solar becomes more commonplace.

How can NextGen solar help you?

Contact us today to schedule a consultation and discover how NextGen Solar can help you harness the power of the sun for a brighter, greener future. Together, let's pave the way towards a cleaner, more sustainable world. Join the solar revolution with NextGen Solar. Your journey to energy independence starts here.

Does Mexico have a solar energy sector?

Mexico is also supporting its solar operations with the development of several solar energy plants that include lithium-ion battery storage facilities. However, the sector still faces some restrictions such as a lack of land for solar operations.

Is solar energy a good investment in Mexico?

Solar resources in Mexico are among the best in the world, with annual daily solar irradiance levels ranging between 4.4 kWh/m² and 6.3 kWh/m². With the country's solar capacity reaching 10GW at the end of 2021, we expect solar energy to continue to present attractive opportunities for project developers and industrial consumers.

Is Mexico a good place to install solar panels?

Mexico is well suited for residential rooftop solar installations, and we expect the market to grow by roughly 10% to 15% annually through 2025. With the high cost of electricity, many are being encouraged to convert their systems to solar. This can also help tackle the uncertainty of blackouts in regions that have a higher risk of power outages.

Does Mexico have a solar system?

The Government of Mexico (GoM) has also helped to support the development of solar generation across the country, taking advantage of Mexico's average of 300 days of sunshine a year. It has extended a simple permit procedure for solar projects of a 500 kW to 2 MW capacity and offers several subsidies for solar systems.
