Will Envision AESC increase its production capacity in 2026?

A leading Japan-based automotive battery maker, Envision AESC, will increase its annual production capacity to 400 gigawatt-hours, about 20 times its current capacity, in 2026, building new plants in six countries. Shoichi Matsumoto, CEO of Envision AESC, revealed the plan in an interview with The Yomiuri Shimbun.

As one of the leading battery technology providers, AESC has 13 manufacturing sites in Japan, U.S., U.K., France, Spain, and China. Envision Energy's intelligent liquid-cooled energy storage system has achieved remarkable success since its launch in 2021, with more than 150 installations completed globally and an order backlog of over 15GWh. ...
