Montenegro: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Herman Spitz, Head of Cooperation Section, EU Delegation Montenegro, added: "Increasing energy efficiency is at the core of EU's Energy Union: it enhances energy security while decreasing CO 2 emissions, boosts innovation and creates jobs in the energy sector. Montenegro is joining this important effort and the EU is supporting the country ...
