

Philking solar Sweden

Why is solar PV not a good investment in Sweden?

Several factors are negatively affecting both the Swedish private and commercial sectors' willingness to invest in solar PV in the short term, such as high interest rates and, consequently, the high cost of capital, the state of the Swedish economy, and global geopolitical events. This is likely to slow down deployment.

Does weather affect solar power generation in Sweden?

PV technologies, as the most mature ones of solar power generation, attract more attention. However, the PV system relies on local weather conditions. Although the studies on other countries could provide some insights, the real capacity and potential under Swedish contexts remain unknown.

Is self-consumption of PV electricity allowed in Sweden?

Self-consumption of PV electricity is allowed in Sweden, and it is the primary business model that is driving the market. Numerous utilities provide a range of agreements for surplus electricity generated by micro-producers. Since the spring of 2014, an ongoing discourse has unfolded regarding the applicable tax regulations for micro-producers.

Our integrated 2-in-1 solar roof system combines Swedish design with the most powerful solar solution. Perfect for new constructions, renovations, and commercial projects. ...
