

Portugal fero energy

Where does Portugal get its electricity from?

A natural gas pipeline from North Africa was completed in 1997. Nearly one-fifth of Portugal's electricity is provided by hydropower, and a smaller proportion comes from thermal energy. In the early 21st century, Portugal increased its use of alternative energy sources.

Does Portugal have solar energy?

Portugal has heavily invested in wind and solar in particular. Regarding solar energy, Portugal has increased its photovoltaic power and solar term energy in the last two decades. The country was actually 9th in solar heating in the whole of the European Union in 2010 based on total volume.

Is Portugal entering the next stage of its energy transition?

"Portugal is entering the next stage of its energy transition," says Ember analyst Matt Ewen. "Wind power and interconnection made it possible for Portugal to phase out coal in 2021; solar is now pushing gas off the grid." Wind and solar produced more than half of Portugal's electricity for the first time last month. Ember

Why does Portugal need fossil fuels?

This is mainly due to the lack of fossil energy sources, which continues to impact the total consumption of primary energy significantly. The main fossil fuels that account for the primary energy supply are oil, natural gas, and coal. It is estimated that Portugal's fossil fuel dependence by 2030 will be around 65%.

How much of Portugal's electricity is produced by solar & wind?

Solar and wind produced more than half of Portugal's electricity for the first time last month, according to new data from clean energy think tank Ember. April saw the renewables reach 51 per cent of electricity production - beating the previous monthly record of 49 per cent in December 2021.

Does Portugal have a high level of electrification?

Portugal has a high level of electrification. In 2019, electricity covered 25% of the total final energy demand, 56% of building energy demand, and 25% of industry energy demand, according to IEA. A significant portion of the electricity in Portugal is produced through a renewable source, over 50%.
