These LFP batteries are ideal for usage in conjunction with solar controllers and solar panels, allowing the battery to be charged even while providing power to an electrical load. Compared to lead acid batteries, our LFP batteries offer outstanding charge life cycles and significantly lighter weight over lead acid batteries for solar applications.

As solar and wind farms usually have an agreed price for their output, asking generators to stop producing energy leaves this cost to be covered, driving energy prices below zero. According to Martin, negative pricing is more common in the UK's Day Ahead and Same Day markets than other markets in Europe; for example, 2 July saw Day Ahead ...
