We believe that achieving net zero is fundamental to all our futures. Getting there means embracing a new energy reality - operating and evolving the current power system, while introducing new sources and emerging technologies.

Front-End Engineering and Design (FEED) studies are underway for the addition of carbon capture and storage (CCS) facilities to VPI's 1,250-megawatt natural gas-fired combined heat and power plant at Immingham, in the Humber region of northeast England. The project is part of the Humber Zero decarbonization program that aims to remove eight million ...

Leading power company VPI has today announced the appointment of Worley to lead preparations for the delivery of its carbon capture project at Immingham. VPI has been working with Worley, a global professional services company of ...

o VPI, a leading power generation company with a growing presence in Ireland, is pursuing its ambition to enable Net Zero by becoming a significant participant in the Irish battery energy storage market. Subject to the receipt of competition approval, VPI will be the majority shareholder in 200MW, 120MWh, of battery energy storage across two [...]

Backed by VPI Immingham power plant and the Phillips 66 Humber Refinery, Humber Zero is a carbon capture and storage (CCS) project on the south bank of the Humber Estuary. The large-scale decarbonisation project will remove up to 8-million tonnes per annum of CO2 at the Immingham industrial site within the next 7 years.

Project supports decarbonisation needs of power and industrial customers. Air Products (NYSE:APD), the world's largest hydrogen producer, and power generator VPI, are pleased to announce the signing of a joint development agreement to drive forward the &quot;Humber Hydrogen Hub&quot; or &quot;H3&quot;, which seeks to develop a flagship 800MW low-carbon hydrogen ...
