How did Reunion Island get its energy?

Whereas in the 1980s all of the energy produced on Reunion Island came from renewable hydroelectricity, the island gradually became dependent on imported fossil fuels.

How can Reunion Island achieve energy autonomy?

Reunion Island aims to achieve energy autonomy and a 100% renewable electricity mix by 2030. Without policy support, the share of renewables remains at the 2008 reference level. The development of biomass, particularly energy cane, is economically interesting. Solar and marine energy need political and/or economic support to be developed.

How can a new energy system be made in RÃ©union?

This includes replacing sugar cane with different food crops; restricting urbanization; increasing the capacity for producing energy from waste; significantly scaling up photovoltaics that convert sunlight directly into energy; and convincing RÃ©union islanders to make certain lifestyle changes.

What is green energy revolution Reunion Island?

Until recently, Reunion Island had implemented the GERRI project, Green Energy Revolution Reunion Island. This economic and social development program centered on the sustainable development of Reunion Island and resulted from the "Grenelle Environment" French environment roundtables.

Can Reunion Island make its electricity 100% renewable?

Reunion Island's plan for making its electricity system 100% renewable involved a multi-fold process. This ambition was established in the law "Grenelle 1" No. 2009-967, whereby the French Ministry of Ecology mandated in April 2009 that all new constructions in overseas departments must install solar water heating.

Why is RÃ©union so worried about energy imports?

Part of this concern stemmed from RÃ©union's over-reliance on imports, including for energy, says Russeil, who is now at the French National Research Institute for Agriculture, Food and Environment in Paris.

In RÃ©union Island, types C and E are the official standards. Just like the rest of France, all French overseas departments have standardized on the same plug, outlets, voltage and frequency. Since type F plugs are identical to type ...

Le Gol has also completed its conversion work. Following the publication of the CRE deliberation of February 24, 2022 ruling on the cost of the complete project for the conversion to biomass of the Albioma Le Gol power plant in Reunion, ...
