The passing of the Inflation Reduction Act in August of 2022 included provisions that are significantly impacting the utility-scale battery storage industry. This includes the decoupling of storage from solar projects, allowing for standalone energy storage projects to qualify for Investment Tax Credits (ITC) up to 30%.

NextEra said its energy storage development programme includes 1,322MW of large-scale battery storage ranging in size from 25MW to 230MW in various US states with signed long-term contracts and a commercial operation date (COD) in 2022. The majority of those 16 projects are four-hour duration battery energy storage system (BESS) projects, with ...

Saint-Pierre was a site for settlement by the French in the early 17th century, later abandoned under the Treaty of Utrecht, and returned to France in 1763 at the end of the Seven Years War. As well, the islands became a place of refuge for Acadian deportees from Nova Scotia. Saint-Pierre figures frequently in North American British-French relations.

Energy storage can be classified into different technologies, but electrochemical storage remains the most prominent technology and battery energy storage (BES) in particular forms a large component of this. Battery energy storage systems: the technology of tomorrow. The market for battery energy storage systems (BESS) is rapidly expanding, and ...
