Our ATOM radio control system establishes a new standard in the market segment of upper mid-range systems. Based on the considerable expertise we have gained from the CORE, together with new developments in electronics, revised software, a ...

The PowerBox Pioneer is the latest development of a 14-channel power supply unit without voltage regulation, designed for HV servos. Since the unit has no voltage regulators, nor the large heat-sink surfaces required for them, it offers ultra-compact dimensions. Even so, the Pioneer still provides redundancy, as is the standard for all power supply units made by PowerBox-Systems.

Powerful dual battery power supply with 7 channels, voltage regulators and telemetry. Item: 4250 Product description The PowerBox Evo is an ultra-compact dual power supply featuring 7 channels, regulated output voltage and telemetry. The 7 inputs are assigned to 10 outputs, allowing two servos to be controlled in parallel
