Is Saudi Arabia a solar power hub?

Saudi Arabia's vast and arid regions are considered a great hub for solar potential. Rich in sunlight and gas, the Kingdom is moving toward diversifying its domestic power supply, and companies such as Saudi Aramco have been using PV panels as a renewable energy source since the 1980s.

What are the major solar projects in Saudi Arabia?

Key projects include the King Abdullah Petroleum Studies and Research Center's solar endeavor and Saudi Aramco's PV carport system. In addition, ACWA Power has recently completed the Al Shuaibah solar projects, which are expected to supply approximately 2.6 GW of solar electricity to the country.

Can Saudi Arabia install solar panels?

(GettyImages) JEDDAH: With sunlight lasting approximately nine hours a day in Saudi Arabia, properties in the Kingdom have been given the green light to install solar panels as an alternative form of electricity generation.

Does Saudi Arabia have solar power?

Saudi officials have talked about solar power for years, and even made plans to install 41,000MW over the next 20 years, but whilst China installed 5,000MW in 2012 alone, Saudi Arabia still has virtually no solar generation capacity. "Nuclear Power in Saudi Arabia". Updated December 2013. Nuclear Power Association.
