

Serbia powersafe sbs 110

What is a powersafe SBS battery?

PowerSafe SBS batteries are manufactured to the highest international standards and are ideal for reliable use in all wireless and fixed-line communication applications. PowerSafe SBS batteries are also widely used in cable TV, emergency lighting, power generations and offshore applications.

Why should you choose EnerSys powersafe SBS 110 batteries?

The advanced thin plate, pure lead technology and unique manufacturing methods used by EnerSys make PowerSafe SBS batteries the choice for long and trouble-free service. The EnerSys PowerSafe SBS 110 batteries are designed to cope with elevated temperatures and harsh environments for long and trouble-free service.

What is a powersafe sbs110?

The PowerSafe SBS110 is smaller than the competition so the design of the front terminal series offers improved flexibility where space is limited and makes installation and maintenance easier and faster. The PowerSafe SBS110 is designed to cope with raised temperatures and harsh environments.

What is the maximum operating temperature of a powersafe SBS battery?

The maximum operating temperature of the PowerSafe SBS battery series can be extended to 80°C via an optional metal jacket. Features Specialist Power Systems are an approved sales partner to EnerSys in the UK with expert technical knowledge.

What battery sizes are available for powersafe SBS batteries?

PowerSafe SBS batteries are available in both 12-volt front-terminal and 2-volt OPzV and OPzS DIN container sizes, and an extensive range of Ampere-hour (Ah) capacities, providing flexibility to fit any setup.

Where are powersafe SBS batteries marketed?

PowerSafe products are marketed under the SuperSafe brand in the following specific countries - India, Indonesia, Malaysia, Singapore, Thailand, Australia and New Zealand. Featuring advanced Thin Plate Pure Lead (TPPL) technology, PowerSafe SBS batteries deliver long life, high energy density and superior shelf life for telecommunications.

PowerSafe SBS EON Technology monoblocs and cells have a shelf life of 2 years when stored at 20°C. Higher temperatures increase the rate of self discharge and reduce storage life. Figure 1 gives the relationship between storage time, open circuit voltage (OCV) and state of charge as a function of temperature. 2.3 Freshening Charge
