A brief outline of Argentina's solar market outlook Argentina is arguably one of the most interesting solar markets at the moment. The South American nation's solar sector has grown by leaps and bounds over the last three years. By the end of 2020, it had an installed solar capacity of 759 Megawatts. This figure is shocking considering that Argentina's solar capacity stood at ...

El concepto "On Grid" hace referencia al tipo de instalación que se encuentra conectado a la red de distribución, permitiendo que los clientes puedan generar y consumir energía solar, pero con el respaldo de la red eléctrica en casos de que su empresa o ...

To connect solar panels to the grid, you need to install a bi-directional meter on your home. This allows energy produced by your solar panels to be fed into the grid when you're not using it, and for you to draw energy back from the grid when you need it. It's essential that a licensed electrician performs the connection to ensure safety ...

La independencia, sistemas "OFF GRID", son la solución ideal para lugares aislados como el campo, donde no hay red eléctrica. Trabajan con baterías, y se dimensionan en función de los consumos que quieras alimentar con energía solar. A estos sistemas se les puede conectar la red o un grupo eléctrico como back up, pero están pensados para trabajar de forma autónoma.
