

# Solar panel with battery price in New Zealand

On average solar batteries sold in New Zealand have a price range of \$6000-\$20000. This range is quite broad; lower-capacity batteries are cheaper than high-capacity batteries. Other than this, some solar panel systems such as Tesla Powerwall 2 have built-in storage systems which are why they cost more.

Solar panels and solar power energy systems have only gotten more affordable as the years have gone on. Just eight years ago, a 3kW system would cost you around \$40,000, while today the same system could be installed for less than \$9,000.

Will solar panels save me money? Electricity prices are continuing to rise in New Zealand. By installing solar panels you can protect yourself against these rising prices. You are essentially locking in your price of electricity for the next 25+ years. A ...

Absolutely! New Zealand has abundant sunshine and generates between 1,700 and 2,100 sunshine hours annually. Some areas, like Nelson and Gisborne, receive as much as 2,400. Solar Panels don't require sunshine; they require daylight, so Solar Panels work year-round, even in the lower South Island.

2 to 5 HVS battery modules can be connected in series in one "Battery-Box" (stack), providing 5.1 to 12.8 kWh of capacity. Additionally, connection of up to 3 identical HVS Battery-Boxes allows a maximum capacity of 38.4 kWh. If you want to start out smaller, the ability to scale by adding HVS modules or HVS Battery-Boxes later is always there.

People measure the worth of solar panels against 3 main values, Saving money, environmental and self-sufficiency. We will explore these values below. Will solar panels save me money? Electricity prices are continuing to rise in New Zealand. By installing solar panels you can protect yourself against these rising prices.

Also worth considering what electricity prices are doing, ie if a large investment in solar now is worth it if prices are 4x higher in x years... Reply reply Taniwha26

Solar Thermal is a Smaller system for a smaller price, but with the biggest impact on your bills! Customer Satisfaction For best result use hybrid inverter with batteries (add another \$2000)

Purchase Price All Day: \$0.28 / kWh: Feed-in Tariff: rate 0 All Day: \$0.17 / kWh: Fixed Charges: Fixed Charge: ... We could get both a hot water and solar battery array from them ...

The Tesla Powerwall 2 has 13.5kWh of usable energy storage. To put that number in perspective, the average New Zealand household uses 20kWh a day, therefore 13.5kWh of power storage should be more than adequate to cover night time power usage. There are plenty of brands on the New Zealand market that claim to have similar storage capacities.
