

Somalia beks energy

Does BECO provide electricity in Somalia?

Beco provides electricity in the cities of Mogadishu, Balad, Jowhar, Afgooye, Elasha, Kismayu, Barawe and Marka. According to the U.S. Agency for International Development (USAID), Somalia has an installed capacity of about 106 MW, and most power companies to date rely on diesel generators for electricity generation.

How can BECO's new solar power plant help Somalia?

Because Somalia struggles with a lack of electricity and high electric costs, BECO's new solar power plant has the potential to positively impact many people's lives. When it opened, the power plant had the capacity to produce 8 MW.

Will BECO expand its solar power plant in Somalia?

The Beco company has the ambition to increase the plant's capacity to 100 MWp, with an investment of 40 million dollars. Pending the expansion of the solar power plant by 2022, the utility will continue to rely on its power generators to supply the Somali capital. The need to invest in battery storage

Why did BECO build a diesel power plant in Somalia?

The plant was recently commissioned by Beco, Somalia's main electricity supplier. Originally, the aim of such a project was not so much to reduce the CO2 emissions of the many diesel-powered generators - a kind of collateral benefit - but to reduce the costs involved in importing fossil fuels for electricity production.

Can BECO's solar power plant lift Somalis out of poverty?

BECO's solar power plant could have a significant impact on Somalis, lifting many out of poverty. Lack of access to electricity is widely cited as a large contributor to poverty. Without electricity, families don't have a non-polluting source of energy for cooking. Refrigerators are unusable. Children can't do their homework after dark.

Can solar power replace diesel generators in Somalia?

A surge in solar power Another source of energy gaining traction in Somalia is solar power. One of the biggest electricity companies in Mogadishu, BECO, set up a solar plant to supplement and, in the long run, potentially replace diesel generators that individuals and businesses have been using for decades, the company said.

Solar energy is naturally more sustainable than fossil fuel, gas generated energy sources and is more environmentally sustainable. store energy A home battery will Allow you to stores energy from solar panels during the day, so you can ...
