

How many energy companies are there in South Sudan?

There are about fourteen of-grid energy companies in South Sudan, and their services include i) selling solar products, ii) engineering, procurement, and construction (EPC), iii) independent power production (IPPs) and iv) developing mini-grids.

What is the governance of the energy sector in South Sudan?

The institutional and regulatory governance of the of-grid energy sector in South Sudan is still nascent. Table 2 below lists the major players participating in the governance of the energy industry and their positions as defined by applicable laws.

What is South Sudan's role as a power utility?

Its role as a power utility is expected to intensify as programmes to increase electricity access in South Sudan are implemented. It is proposed under the Electricity Bill 2015 as the regulatory entity for the electricity sector in South Sudan. It would function as the energy regulator whose functions would include the creation of regulations.

How much liquid fuel does Sudan produce a day?

Sudan produced an average of about 70,000 barrels per day (b/d) of total liquid fuels in 2023, and South Sudan produced an average of about 149,000 b/d. Sudan's total liquid fuels production has steadily and significantly declined over the past decade because upstream exploration and development has been lacking in the country.

Does Sudan produce natural gas?

Neither Sudan nor South Sudan produces or consumes any natural gas. Neither Sudan nor South Sudan produces or consumes any coal. Total installed generation capacity in Sudan was 4.5 gigawatts (GW) in 2021.

Is South Sudan a good place to buy energy?

Based on independent sources from consumers and suppliers, most of-grid energy products available in South Sudan are neither standardised nor quality verified. This hinders uptake, as many households reported quality to be a main factor in their purchase decision, especially in urban areas.
