

What did the energy storage rulemaking entail?

This rulemaking identified energy storage end uses and barriers to deployment, considered a variety of possible policies to encourage the cost-effective deployment of energy storage systems, including refinement of existing procurement methods to properly value energy storage systems. This rulemaking resulted in two CPUC Decisions, which are:

What did the CPUC request for SCE's energy storage solicitation?

It also requested the CPUC to direct an electrical corporation serving the Los Angeles Basin to procure through a competitive solicitation a minimum of 20 MW. Resolution E-4937 approved SCE's energy storage solicitation to comply with SB 801.

How many MW of energy storage will be built in SCE?

Resolution E-4937 approved SCE's energy storage solicitation to comply with SB 801. To date the CPUC has approved procurement of more than 1,533.52 MW of new storage capacity to be built in the State. Of this total 506 MW are operational.

Where can I find information on the energy storage program & projects evaluation RFP?

CPUC staff received comments on the RFI and updated the RFP for release. More information on the energy storage program and projects evaluation RFP can be accessed at Cal eprocure. The energy storage program and projects evaluation Bidders' Library can be accessed here. The CPUC engaged Lumen Energy Strategy, LLC to conduct the study.

What is the AB 2514 energy storage procurement policy?

In 2013, the CPUC issued Decision (D.)13-10-040 which set an AB 2514 energy storage procurement target of 1,325 megawatts (MW) by 2020. The CPUC's energy storage procurement policy was formulated with three primary goals: Greenhouse gas (GHG) reductions in support of the State's targets.

The Federal Energy Regulatory Commission (FERC) defines energy storage as "a resource capable of receiving electric energy from the grid and storing it for later injection of electric ...

The Cyprus Recovery and Resilience Plan will lead to the establishment of a regulatory framework for promoting the participation of storage facilities in the electricity ...

The Kerala State Electricity Regulatory Commission (KSERC) has approved Kerala State Electricity Board Limited's proposal to set up a 125 MW/500 MWh battery energy ...

1.9 Timelines for Filings MYT ARR and Tariffs for the control period as per Regulation No.4 of 2005 1.9.1

As per clause 6.1 of Regulation No.4 of 2005 every distribution licensee shall file a ...

The Andhra Pradesh Electricity Regulatory Commission ("APERC") on June 30, 2025, released the draft APERC [Planning, Procurement, Deployment, and Utilisation of Battery Energy ...

Presentation | Report FERC staff today issued its annual State of the Markets report for 2024 to provide the industry and public with key information on market conditions and ...

In accordance with the provision under Section 86(1)(e) of Electricity Act, 2003, the Commission is mandated to promote Co-generation and Generation of electricity from Renewable Sources of ...

**STORAGE POLICY ASSESSMENT** With its innovative and ambitious policies, California is a global leader in the development and application of energy storage technologies. For the last ...

recent Federal Energy Regulatory Commission (FERC) order defines energy storage as "a resource capable of receiving electric energy from the grid and storing it for later injection of ...

ies capable of storing previously generated energy and releasing energy at a later time to feed electricity into grid. Electric storage technologies may store energy as potential, kinetic, ...

December 16, 2021 - The California Public Utilities Commission (CPUC), in ongoing efforts to ensure summer energy reliability and support a healthy environment, today approved an ...

For example, beyond the electricity system, thermal storage can contribute to the decarbonisation of the heating and cooling sectors. In concrete terms, the Commission is ...

These webinars, custom-designed in close collaboration with regulatory commission staff, have already engaged regulators from over a dozen states on topics including energy storage ...

High-Rise Multifamily buildings and some nonresidential building categories are prescriptively required to have a battery energy storage system. Performance compliance credit is also ...

If the authority and the city decide to proceed after completing environmental review, the San Vicente Energy Storage Facility would provide up to 500 MW of long-duration ...

Energy storage still faces significant challenges to reaching its full potential and these challenges are exacerbated as the time frame to reach widespread commercial use becomes increasingly ...

The RTOs/ISOs are directed to accomplish four principal objectives: (i) make changes such that an electric storage provider can fully participate in all capacity, energy and ancillary services ...

1. Section 86(1) (e) of the Electricity Act, 2003 authorizes the State Electricity Regulatory Commission to promote co-generation and generation of electricity from Renewable Source of ...
