

Successful bid price of business energy storage project in Ireland 2026

How good is Ireland's energy storage strategy?

Smith pointed out that Ireland's energy storage strategy, published in 2024, was "quite positive." A lot of high-level plans and a technology agnostic outlook. "Unfortunately, we haven't seen a lot of progress on those actions which is a problem we are trying to address," said Smith.

How much does EirGrid's T-4 capacity auction cost?

EirGrid assigned 7.2 GW of capacity in its latest auction, with 5.4 GW to come from gas power plants. The auction clearing price reached EUR83.050 (\$90.554)/MW per year. Irish grid operator EirGrid has published the provisional results of its latest auction for the capacity market - the so-called T-4 Capacity Auction.

What challenges does Ireland's Bess market face?

According to Bobby Smith, head of Energy Storage Ireland (ESI), one of the main obstacles Ireland's BESS market faces is the lack of route to market for battery operators. "A lot of energy storage has crept under the radar so far in Ireland," he told ESS News. Developers secure planning quite easily but the route to market is a challenge.

How much battery storage does Ireland have?

There is just under a gigawatt of battery storage on the grid operating today. In addition to the almost 1 GW of BESS, Ireland also has 292 MW of pumped hydro at the Turlough Hill site in County Wicklow, which has been operating since the 1970s.

Our Renewables business also secured a 10-year capacity agreement for the proposed 100MW / 200MWh Derrymeen battery storage project in Co. Tyrone (14MW). The ...

Sinn Féin: Investment in energy storage "no brainer" in reducing prices Increased investment in energy storage would deliver savings of up to EUR85 million a year, according to Mary Lou ...

Description Today's electricity market is designed around marginal-cost energy, backup capacity and a small amount of system services. In the future, renewable electricity will need long-term ...
