

Successful bid price of business energy storage project in South Africa 2025

Why should we invest in battery energy storage in South Africa?

We applaud the South African government's commitment and dedication to the renewable energy procurement programmes. Battery energy storage will continue to play an important role in the energy transition, and we will continue to be at the forefront across our core markets," says Scatec CEO Terje Pilskog.

How much does Scatec's battery energy storage project cost?

The estimated total capex for the battery energy storage project is ZAR 2.2 billion (USD 120 million) of which Scatec's EPC contracts account for approximately 80%. The project will be financed by 90% non-recourse project debt and the remaining by equity from the owners.

How will Bess projects impact South Africa's Energy Security?

As South Africa continues to grapple with frequent blackouts and load shedding, these BESS projects will help mitigate risks and contribute to the country's energy security. The Gainfar Project will be connected to the Ngwedi substation, while the Boitekong Project will be connected to the Marang substation.

When will a new battery procurement be based on the Integrated Resource Plan?

Electricity and Energy Minister Dr Kgosientsho Ramokgopa has said that any additional battery procurement will be based on the 2025 edition of the Integrated Resource Plan, which is being discussed at the National Economic Development and Labour Council (Nedlac). The Nedlac process should be concluded during June.

How much does a 123 MW Bess project cost?

the 123 MW Retreat BESS project at the Merapi substation, with an evaluation price of R2 477.86/MWh. Scatec, of Norway, prevailed with its 123 MW Haru BESS project at the Leander substation, with a R2 037.10/MWh evaluation price. All the projects will use lithium-ion battery technology.

How many projects were selected in the Free State supply area?

Following a rigorous evaluation process conducted under tight security protocols by an independent bid evaluation committee, five projects--each tied to a specific site in the Free State Supply Area--were selected, totaling 616 MW in awarded capacity and representing a combined investment of R9.5 billion.

By 2030, renewable energy will power 41% of South Africa's electricity grid. Large-scale solar and wind projects, combined with energy storage, will strengthen energy ...

South Africa's energy landscape is poised for transformation in 2025, driven by regulatory changes, advancements in technology and the urgent need to address the country's ...

A 540 MW solar and 225 MW/1,140 MWh battery storage hybrid project has commenced operations in South

Successful bid price of business energy storage project in South Africa 2025

Africa. The project, located in the town of Kenhardt in Northern Cape ...

South Africa's Ministry of Electricity and Energy has announced the list of bids received for Bid Window 3 of the Battery Energy Storage Independent Power Producers Procurement Programme (BESIPPPP). Thirty ...

South Africa's renewable energy and battery storage capacity is set to improve following the announcement of preferred bidders for two key procurement programmes.

The two successful project companies have committed to preferential procurement of R3-billion from broad-based black economic-empowerment companies and to ...

Share This Article South Africa 's Independent Power Producers Office has announced the submission of 33 bids by 28 companies for Bid Window 3 of the Battery Energy Storage Independent Power Producers Procurement ...

Updated 1st July 2025 - The Red Sands Battery Energy Storage System (BESS), set to be Africa's largest of its kind, has officially reached commercial close. Developed by Globeleq, which is 30% owned by Norfund, in partnership with ...
