

Successful bid price of floor standing battery project in Belgium 2025

Why is Belgium a good place to invest in a battery?

Other factors that make Belgium an appealing location for battery investments are the exemption of TSO grid fees and high revenues from balancing market (mainly FCR and aFRR)," Simon De Clercq, senior research associate at Aurora Energy Research, told ESS News.

How much battery storage capacity does Engie have in Europe?

ENGIE reaches 500 MW of battery storage capacity in Europe, either installed, under construction or under development. ENGIE's BESS project for installed capacity of 100 MW has been selected in the 4th Capacity Remuneration Mechanism (CRM) auction in Belgium.

Are merchant-exposed projects sourcing project finance in Belgium?

"We have seen similar or even much bigger merchant-exposed projects sourcing a large share of their financing through project finance in the Netherlands recently, but Belgium is a bit more complex market," BStor's Pierre Bayart said.

What is a derating factor in a battery bid?

"The duration of the battery will result in a different derating factor of the bid," De Clercq said. The derating factor is a percentage that reflects how much of a project's total capacity is "usable" for ensuring grid reliability during periods of high demand or stress.

Commenting on the success of solar bids over onshore wind, a solar PV industry expert told Energize: "The choice is simple - solar is more cost-effective in today's market." The current successful bidders under REIPPPP ...

Understanding offtake contract innovation supports decision making Reading time: 10 min The financial viability of Battery Energy Storage Systems (BESS) and renewable ...
