

Successful bid price of wall mounted battery project in New Zealand 2030

Will a Bess battery offer value to Wel Network customers?

"We strongly believe that our battery will offer value to WEL network customers by supporting the charging of EV's, maximising the benefits of solar power and providing back up during grid emergencies." Dibley says. The BESS is expected to be commissioned by October 2022.

How much does a WEL network battery charge?

From 10 January to 17 March 2024, WEL Networks' battery discharged into the grid during 473 trading periods (13% of the time) and charged during 625 trading periods (17% of the time). From January to March 2024, the mean discharging spot price was \$236/MWh and the median was \$219/MWh.

Why should we invest in a Bess battery?

The BESS will provide the opportunity for more renewable generation to be installed, with the large scale battery able to store energy from a range of renewable sources including wind and solar.

Ekus Energy, the battery storage platform of Macquarie's Green Investment Group (GIG), has acquired an energy storage project in New Zealand, a move that marks its entry into the country.
