Solar panel efficiency is about converting sunlight into usable power. In 2024, standard photovoltaic panels are running at 15-22% efficiency, a steady improvement from just a few years back. But there's a range here for a reason--not all solar panels are built the same. Recent breakthroughs by solar panel manufacturers and researchers have ...

The Swedish manufacturer SUNBEAM system is the market leader in flexible and walk-on solar panels. These solar panels are developed for use in demanding conditions and are ideal for water sports. The high-tech panels provide a reliable source of energy and guarantee the highest possible yield per square meter.

The Maxa series has been designed as the ideal solar panel for use on both motorhomes and yachts, where value for the money matters. With a build quality and durability outshining the competition. The low weight and 3mm thickness makes it perfect for rooftop integration. Avoid the weight, air turbulence and ugliness caused by solid solar panels.
