

Sunshine solar battery Maldives

What are Maldives doing besides solar?

Besides solar energy, Maldives is setting up an 8MW waste-to-energy plant with assistance from the Asian Development Bank. They also have a pilot on wave energy and are mulling over project proposals on ocean thermal energy conversion, or OTEC. Maldives plans a push for electric vehicles and is seriously looking at the option of green hydrogen. Maldives is not just focusing on solar energy.

How will ASPIRE and ARISE help the Maldives' energy transition?

World Bank-financed projects ASPIRE and ARISE support the Maldives' energy transition by installing more than 53.5 megawatts of solar capacity and 50-megawatt hours of battery storage. This will reduce Maldives' annual import bill by about \$30 million, with a project lifetime saving of \$756 million over 25 years.

What are the challenges facing solar projects in Maldives?

Challenges facing such projects include integrating solar with existing power sources on the grid, off-taker risk, weak procurement, and planning capacity. The objective of the ASPIRE project is to increase photovoltaic (PV) generation in Maldives through private-sector investment. Approved in 2020, the ARISE Project scaled up this process.

Where are floating solar systems located in Maldives?

The first floating solar system in Maldives went into operation in 2014 and is located in lagoon areas where there are no coral patches. Q: Are you still working towards the 20% renewables share target, as outlined in the Strategic Action Plan 2019-2023?

How will ASPIRE solar projects benefit Maldives?

In general, the projects will benefit the people of Maldives and the government by lowering electricity prices and providing quasi-budgetary support. 2014 - The first 1.5 megawatt (MW) solar project under ASPIRE had four investors' bids, resulting in a high PPA of 21 US cents per unit of electricity.

How much solar energy will be produced in Addu?

In Addu, there will be 2MW of ground-mounted solar with batteries for storing and using solar energy produced during the daytime when demand is limited. An additional 5MW will be produced in the Male region.
