

Tanzania inter power ltd

Why is Tanzania developing a new transmission network?

The project forms part of the Government of Tanzania's plans to improve power access and reliability, as it manages rising demand for electricity in the country. 6,200 MW of new generation capacity is planned to be added to the grid by the end of the decade, and Tanzania is developing the transmission network required to evacuate this power.

Does Tanzania have electricity?

The East African country of Tanzania, with a population of around 62 million and an electrification rate of only 30 per cent, continues to struggle with providing electricity access to its population.

How many transformers were installed at Tanzania's largest hydropower plant?

In August 2020, TANESCO installed 27 transformers at the construction site of Tanzania's largest hydropower plant to increase the transmission voltage of electricity from 15 kV to 400 kV. In late 2020, construction began on the Tanzania-Zambia Transmission Interconnector Project (TAZA). Capacity expansion plans

How many MW of power will be added to Tanzania's grid?

To meet this demand, around 6,200 MW of new generation capacity is planned to be added to the grid, of which 71.5 per cent will be based on hydro and renewable energy sources. In parallel, Tanzania is focusing on the development of its grid network to evacuate power from the planned generation facilities.

Can Tanzania achieve 100 per cent universal access to modern energy?

Tanzania has also set a target to ensure 100 per cent universal access to modern energy by 2030. Currently, Tanzania generates electricity using a variety of energy sources, including thermal, hydro and some renewable.

What will Tanzania's electricity demand look like in 2022?

According to Tanzania's PSMP Update 2020, electricity demand is expected to rise from 10,176 GWh in 2022 to 28,663 GWh in 2030, representing a 13.82 per cent compound annual growth rate (CAGR). To meet rising demand, the country intends to add approximately 9,000 MW of new generation capacity by 2030.
