

Tesla solar Norfolk Island

Does Norfolk Island have too much solar energy?

That's pretty impressive given its remoteness and a population of 1,849. But this uptake has also caused some headaches in managing Norfolk Island's electricity network, with too much solar energy goodness generated at times. The Tesla battery system installed in December 2020 has helped out on that front.

How many solar panels are there in Norfolk Island?

44 km of high and 44 km of low voltage cabling. Distributed household rooftop PV systems. There have been more than 555 small-scale solar power systems installed on Norfolk Island, with a collective capacity of 1,770 kW. That's pretty impressive given its remoteness and a population of 1,849.

What equipment does Norfolk Island have?

Among Norfolk Island's electricity generation and infrastructure assets: 6 x 1.0MW diesel generators. 4 x 750 kVA 415/6600 volt step-up transformers. 125 kW standby generator for powerhouse essentials, hospital and airport. A 2MW Tesla battery system for slurping up surplus solar energy.
