

The best power station Syria

How many power plants were destroyed in Syria?

Violence and looting destroyed three major power plants in Syria between 2015 and 2017: the Aleppo Thermal Station, Zaytoon in Idlib, and al-Taim in Deir Ezzor. Pre-war, these three plants accounted for almost one-fifth of Syria's total generation capacity.

What is the Syrian five-year plan for the electric sector?

The Syrian Five-Year Plan for the Electric Sector (2001-2005) also advocates the construction of new power plants and the improvement of power generating capacity through the rehabilitation of existing power plants as well as the promotion of a shift from oil fuel to natural gas in order to prepare for future increases in power demand.

What type of energy is primarily used in Syria?

In Syria, most energy is based on oil and gas. Some energy infrastructure was damaged by the Syrian civil war. In the 2000s, Syria's electric power system struggled to meet the growing demands presented by an increasingly energy-hungry society.

Why is energy demand increasing in Syria?

Energy demand in Syria has been increasing at a rate of roughly 7.5% per year due to the expansion of the industrial and service sectors, the spread of energy-intensive home appliances, and state policies that encouraged wasteful energy practices, such as high subsidies and low tariffs.

Aukey's PowerTitan is in a close tie with RAVPower's power station above. It also has high-efficiency, a nice array of ports, a fairly fast re-charge time, and an affordable price.
