

The first new energy storage technology conference

What is the energy storage global conference?

The Energy Storage Global Conference offers the opportunity to industry, researchers, and policymakers to exchange views and debate key issues faced by the energy storage sector. The 3-day conference will also explore the extent to which energy storage can help avoid dependency on fossil fuels in order to balance the electricity system.

What is China International Energy Storage Conference?

The China International Energy Storage Conference is a platform focusing on industrial energy storage manufacturing. Here we showcased new technologies and were very happy to see many customers coming to our booth to communicate. In the future, we will participate in the exhibition with better solutions.

Will 2025 China energy storage industry pioneer award winners be included in this book?

2025 China Energy Storage Industry Pioneer Award winners have the opportunity to be included in this book. Please contact us for details.

What is the energy storage exhibition & docking platform?

It is one of the most influential industry exchange and docking platforms in the global energy storage field, and is known as a high-standard exhibition with high gold content and strong guidance in the energy storage industry. It is a weathervane for the development of China's energy storage industry.

Why is energy storage important?

Energy storage is an important component and crucial technique in renewable energy system. It is the basis of realizing the wide application of distributed energy and micro grid, realizing energy interconnection and sharing, and realizing network integration.

How will China's 13th Five-Year Plan impact the development of new energy?

In recent years, the situation of the development of new energy in China is promising. China's 13th Five-Year Plan focuses on pushing forward electric power system reform, in which the establishment of global energy interconnection will be the highlight.

The 9th (2024) International Energy Storage Technology, Equipment and Application Conference will invite policymakers, experts and scholars, leading enterprises, financial institutions, ...

The International Conference on New Energy, Storage Technologies and Low-carbon Development 2025 (ICNESTLD 2025) is scheduled to be held in Dalian, China. The ...

Leading the Charge in Battery Technology for Over 40 Years CALL FOR SPEAKERS NOW OPEN Founded

The first new energy storage technology conference

in 1983, the International Battery Seminar & Exhibit has established itself as ...

Fully initiating international cooperation to support energy storage companies to expand globally. The expo will invite participation from power companies, power generation groups, grid ...

KPMG China and the Electric Transportation & Energy Storage Association of the China Electricity Council ("CEC") released the New Energy Storage Technologies Empower Energy ...

As the basic unit of energy storage and conversion device of new energy vehicles, power batteries are the core components of new energy vehicles, and their technological ...

It covers six major industries: new energy, new energy vehicle, new material, high end equipment manufacturing, energy conservation and environmental protection and ...

The development of energy storage is a key measure for the construction of new power systems. In 2017, China's first guiding policy for large-scale energy storage technology ...

Lin Ruiliang, vice governor of Fujian Provincial People's Government, declared the conference open The first World Energy Storage Conference officially opened on ...

The 2023 World Energy Storage Conference is an important platform to promote cooperation in the energy storage industry. At the meeting, Ningde City held a centralized ...

Join the NY-BEST Annual Fall Energy Storage Technology and Innovation Conference to explore advancements in energy storage and network with industry leaders.

In this context, in order to help the development of the new energy battery industry and respond to the "Made in China 2025" strategy, the "GBA Energy ...

Energy Storage Conferences 2025 2026 2027 is for the researchers, scientists, scholars, engineers, academic, scientific and university practitioners to present research activities that ...

Conference Overview: NY-BEST is hosting our Annual Fall Energy Storage Technology and Innovation Conference on Thursday, October 24, 2024, at the Doubletree by ...

Energy storage is a key technology of the energy revolution, an important support to achieve the goal of carbon peak carbon neutral, but also an important field to give birth to ...
