

# Turnkey residential solar battery EPC contract price in Serbia

How much electricity can a solar power plant produce in Serbia?

"The solar power plants will be able to produce an average of 1.6 TWh to 1.7 TWh, which is equal to Serbia's imports, at a time when electricity is quite expensive and highly sought-after in the region," he said.

Is solar a good option for Serbia?

A statement published on the Serbian government's website says solar is the most optimal solution to quickly reach large capacities from green sources, without burdening and endangering the stability of the transmission network. Serbia currently gets more than 60% of its electricity from fossil fuels.

What happens after EPs signing a power plant contract?

The signing will be followed by talks on financing terms. Once the construction is completed, the plants will be handed over to state power utility Elektroprivreda Srbije (EPS).
