Key Features: Huawei is a major player in the solar industry, and the SUN2000L-3KTL is a popular choice for its smart features and high efficiency. It boasts a maximum efficiency of 98.4% and comes equipped with Huawei's AI FusionSolar Smart String Monitoring service. This advanced monitoring system allows for real-time performance ...

It can also supply the house with hot water through a solar water heater (or CESI). Finally, it can supply heating and hot water: the installation is then called a Combined Solar System (heating + hot water). It must be understood that solar energy can hardly meet all the needs of the house and therefore complementary energy is generally required.
