

What is Uzbekistan's solar energy vision?

It outlines the sustainable energy environment solar energy could deliver and offers a timeline up to 2030. In this vision, Uzbekistan succeeds in maximising the benefits of solar energy capacity for both electricity and heat, making solar energy one of the country's major energy sources.

Will Uzbekistan fund a 250-megawatt solar photovoltaic plant?

TASHKENT, May 21, 2024 -- The World Bank Group, Abu Dhabi Future Energy Company PJSC (Masdar), and the Government of Uzbekistan have signed a financial package to fund a 250-megawatt (MW) solar photovoltaic plant with a 63-MW battery energy storage system (BESS).

Is Uzbekistan a good place for solar energy?

Uzbekistan has great potential for solar energy due to its high levels of solar radiation and large areas of barren land that can be used for solar power plants. The country receives an average of around 300 sunny days per year, making it an ideal location for solar power generation. Graphs are unavailable due to technical issues.

How to make solar energy a key energy source in Uzbekistan?

The policy and regulatory frameworks enabling further solar energy deployment in Uzbekistan. Increasing power system flexibility to integrate the increasing amount of solar generation. Finally, the recommended actions are a co-ordinated package of measures to implement to make solar energy the key energy source in Uzbekistan in 2030 and beyond.

What is solar energy potential in Uzbekistan?

The solar energy gross potential totals 2.134×10^3 PJ, while technical potential is estimated at 411.7 PJ, which is equivalent to almost four times the country's current primary energy consumption (Table 1).
Table 1 Renewable energy source potential in Uzbekistan

Should Uzbekistan decarbonise solar energy?

This roadmap provides a timeline through 2030 with key actions. In addition, in order to further enhance solar energy use beyond 2030 and move progress toward clean energy transitions, the government of Uzbekistan may need to also consider decarbonising other sectors.
