After seven years of development, the microgrid at Marine Corps Air Station (MCAS) Miramar near San Diego has achieved yet another milestone with the addition of a 1.5 MW / 3.3 MWh battery energy storage system (BESS). Designed and installed by Schneider Electric, the BESS increases the microgrid's energy storage capacity by 1,500kW / 3,300 KWh.

In [26], a distributed operation strategy using double deep Q-learning method is used. It is applied to managing the operation of a community battery energy storage system (BESS) in a microgrid system. In contrast to Q-learning, the recommended operation approach can cope with uncertainties in the system in both grid-tied and stand-alone modes.

ESS helps in the proper integration of RERs by balancing power during a power failure, thereby maintaining the stability of the electrical network by storage of energy during off-peak time with less cost [11].Therefore, the authors have researched the detailed application of ESS for integrating with RERs for MG operations [12, 13].Further, many researchers have ...
