For many homeowners, solar panels are a long-term investment in energy cost savings. On average, it takes between 7-10 years to break-even, leaving decades to accumulate savings.

Off grid photovoltaic systems are completely independent of the grid. The energy produced by the solar panels are collected and stored in special batteries that are rechargeable. A device called a charge controller regulates the raw DC power to prevent overcharging and protect the batteries. Batteries store energy in the form of Direct Current, therefore another device called an inverter ...

I think I saved at least \$25k. After I struck out getting turnkey quotes for the total system, I tried a round of "assume the carport is in place, assume the racking system is all installed, designed to match up to the mounting holes of this bifacial panel - would you quote me on you handling the solar system install.
