

Wholesale lead acid battery storage price list in Australia

What is a lead acid battery?

A bank of lead-acid batteries Lead acid batteries are the most common form of solar battery storage currently on the market. Battle-tested, thousands of Australians have used banks of lead-acid batteries with solar electricity to remove their need to be connected to the traditional electricity grid.

Who are the largest wholesale battery suppliers Australia?

Battery Specialists are the largest wholesale battery suppliers Australia. With wholesale pricing, we can beat Battery World and Batteries Direct prices.

How far should lead acid batteries be stored?

There should be a minimum of 3 m between the storage of lead acid batteries or battery acid and any offices, retail stores, warehouses or other shop. However, this distance may be reduced given that the stores/shops/warehouse play an integral part in the management of storage.

Are lead acid batteries a hazard?

Battery acid spillage. Another hazard from lead acid batteries is the generation of flammable gases hydrogen and oxygen during battery charging.

Do lead acid batteries have a PG?

Australian Dangerous Goods Code. Lead acid batteries (UN2794 - BATTERIES, WET, FILLED WITH ACID, electric storage) do not have a given PG. However, components of these batteries, and substances that may be present in battery storage areas such as battery acid.

How long do lead acid batteries last?

Here's some specs about lead acid battery systems: They will give you 1000-3000 cycles at about 60% depth of discharge. In plain English: You can discharge them 60% 1000-3000 times depending on the quality (price!) of the batteries. So if you are discharging 60% every day, they'll last 3-8 years.
