ZNL Energy's technology is a disruptive innovation that could potentially transform the battery industry. Our separator can prevent the flow of electrons in the event of a thermal runaway, which is a phenomenon that can occur when a battery overheats and can cause a fire or explosion.

ZNL Energy provides zinc-ion battery cell technology for stationary energy storage. Applications range from home energy storage to industrial-scale projects, including renewable energy. The technology uses abundant, recyclable, sustainable and fireproof materials, resulting in a high-quality, low-cost battery that meets all market requirements.

We in ZNL Energy AS can deliver a state of the art separator called ZnL-NP_x to the battery industry. Being a company that enables delivery of separators from Europe, we see a lot of interest in ...

ZNL Energy has developed the ZNL-NP15 lithium-ion battery separator made of polyphenylene sulphide (PPS), a chemical and heat-resistant plastic material. The fire safety properties of the ZNL-NP15 make it ideal for use in all types of lithium-ion batteries. In particular, the separator increases fire resistance by inhibiting short circuiting.
