The Boxö battery was the largest Russian installation in Åland during World War I, and together with other coastal artillery, it was part of a defence system aimed at blocking the Finnish Gulf. Before the battery was demolished in 1919, there were both powerful cannons and even a railway on the island!

Wir möchten unsere Kunden und Partner darüber informieren, dass für die GreenRock Energy AG sowie ihre Schwesterunternehmen, die GreenRock Service GmbH, die GreenRock Construction GmbH und die GreenRock Energy Austria GmbH, ein Insolvenzverfahren eröffnet worden ist. Diese Unternehmen sind Tochtergesellschaften der GreenRock Capital GmbH.

The construction of the Sålis Battery started in 1916 and it was ready in 1918. It was a part of a larger fortification project resulting in a defensive line stretching from the Åland Islands to what is today Saaremaa in Estonia. The Russian troops left the Åland Islands in 1918 after Finnish independence. All batteries were demolished in 1919.

Åland's 6,700 islands are clustered in the middle of the Baltic Sea, offering a cultural fusion of Sweden and Finland. Åland has one city, Mariehamn, and a living, breathing countryside and archipelago. For the past 100 years, Åland has been an autonomous region in Finland. This means that Ålanders can form a society that meets their own ...
